<b>Database</b>	MongoDB, My SQL, Firebase
<b>Version Control</b>	Git, GitHub, VS Code

## PROJECTS

---

### GEMINIAICLONE

An AI-based conversational web application inspired by Google's Gemini.

- Built using **React.js** for the frontend and **Tailwind CSS** for elegant, responsive UI.
- Integrated **Firebase Authentication**, **Firestore** for real-time database, and **Firebase Storage** for handling file uploads.

### IMAGIFY – Image Enhancement & Transformation Tool

A web-based tool for smart image enhancement using AI.

- Developed with **React.js** and **Tailwind CSS** for a sleek, responsive UI.
- Integrated the Imgify API to enable real-time image editing, enhancement, compression, and transformation
- Implemented backend logic with **Node.js** and **Express.js** for secure API routing and processing.
- Demonstrates advanced file handling, third-party API integration, and interactive frontend development.

### INFOYIELDX

Built and deployed the official web platform for Infoyieldx using the MERN stack

- Developed reusable UI components with React and Tailwind CSS
- Built backend APIs for project listings, resume handling, and contact form submission.
- Ensured mobile responsiveness, SEO readiness, and performance optimization.
- Collaborated on deploying the app using Netlify(frontend) and Render (backend).
